Summary

Computer Science Engineering (AI & ML) student with hands-on experience in Java, Spring Boot, and AI/ML. Built scalable backend applications and AI-powered solutions using Deep Learning and NLP, with strong problem-solving and API development skills. Seeking Software Engineering or AI/ML roles.

Education

SRM Institute of Science And Technology, Tiruchirappalli campus. Aug 2023 – May 2027
B.Tech.-Computer Science and Engineering with specialization in Artificial Intelligence and Machine Learning

- GPA: 8.76/10

Technical Skills

Languages: Java, Python
Backend: Spring Boot, Spring Security, Hibernate, REST APIs
Frontend: HTML5, CSS3
Databases: PostgreSQL
AI/ML: Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI
Tools & Platforms: Git, GitHub, Maven, Postman, Google Colab, Jupyter Notebook

Projects

InterviewIQ – Smart Interview Management System(In Progress) GitHub Link

- Built a production-ready interview management platform for tracking interviews, managing questions, recording interview journals, and monitoring progress.
- Developed using Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, JWT, Swagger/OpenAPI, and Docker, implementing secure REST APIs, validation, pagination, sorting, JPQL, and role-based access control.

  Tech Stack: Java, Spring Boot, Spring Security, Hibernate, PostgreSQL, REST APIs, Maven, Postman

Network Intrusion Detection System (CNN–LSTM) GitHub Link

- Engineered a hybrid CNN–LSTM deep learning model on the NSL-KDD dataset, achieving 97%+ detection accuracy across 5 attack categories (DoS, Probe, R2L, U2R, Normal).
- Addressed Class Imbalance for rare attack types (R2L, U2R) and Deployed a real-time monitoring dashboard via Flask REST API.

  Tech Stack: Python, TensorFlow, Keras, CNN, LSTM, Flask, NSL-KDD Dataset

CyberBullying Detection in Social Media Comments GitHub Link

- Fine-tuned DistilBERT on the Jigsaw Toxic Comment Dataset for multi-label classification across 6 toxicity categories, achieving F1 score of 0.87+.
- Built and deployed a real-time inference pipeline via Streamlit and a Chrome Extension for live content moderation on social platforms.

  Tech Stack: Python, DistilBERT, Hugging Face Transformers, PyTorch, Pandas, Streamlit

Certifications

Machine Learning A-Z: AI, Python & R, Udemy Certificate Aug 2025

- Completed 40+ hours covering supervised & unsupervised learning, model evaluation, and deployment.

Java Certificate, HackerRank Certificate Oct 2024

- Demonstrated proficiency in Core Java, OOP concepts, collections, exception handling, and problem-solving.

Leadership & Activities

Yuva – 24-Hour Hackathon at SRM Institute of Science and Technology, Tiruchirappalli Certificate Oct 2025

- Coordinated end-to-end operations for a 24-hour hackathon with 100+ participants, managed a 3-member logistics team, and supported technical infrastructure across all event rounds.
